

Groundwork™
BioAg 

Rootella® X

Rootella® X concentrated seed treatment effectively inoculates plants with vigorous endomycorrhizal fungi.

Mycorrhizal inoculation by application of **Rootella®** products improves plant nutrient uptake.

Net weight:
250 gr (8.8 oz)

LET YOUR GROUND WORK™

Rootella® X

PRODUCT APPLICATION

Rootella® X is suitable for seed treatment on corn, soybean and most row crops, using a wide range of equipment.

Mix 0.21 oz (6 gr) per acre (or 15 gr per hectare) of Rootella® X in agitated seed treatment tank, immediately prior to coating process.

This bag treats approximately 42 acres (17 hectares).

PRODUCT COMPOSITION

GUARANTEED ANALYSIS

Active Ingredient.....30%

Glomus intraradices.....167,000 propagules/gr
(4,734,000 propagules/oz)

Total Other Inert Ingredient

Diatomaceous Earth.....70%

STORAGE

Protect from direct sunlight and store in a dark and cool place between 5-25°C (40-77°F). Do not refrigerate or freeze.

TERMS OF USE

Any reproduction, breeding, transformation or reverse engineering is prohibited. Product embodies proprietary information and may be used only for agricultural purposes. Limitation of Liability: The mycorrhizal inoculant is sensitive to environmental conditions and Groundwork BioAg Ltd. is unable to make any warranties with respect to its performance. Groundwork BioAg Ltd. is not responsible for the use or misuse of this product. Liability is limited to the amount paid for the product (excluding shipping costs). Use only as directed. If you have any difficulty in the use of the product, please contact us at: info@rootella.com.

WARNING

Do not inhale. Long term exposure to any respirable mineral dust could cause slight effects on the respiratory system. Keep bag tightly sealed after use.

IF INHALED: Move to dust-free fresh air. If respiratory distress develops, seek medical attention. See Safety Data Sheet for further details regarding safe use of this product.

USAGE

IMPORTANT Avoid use of systemic fungicides, as these may kill mycorrhizal fungi. Non-systemic or foliar fungicides and fungicidal seed treatments are mostly compatible. See Rootella® Compatibility Tool on our website for more information. Minimize use of starter phosphorus fertilizer to enhance mycorrhizae.
